

DISCOVER NEXT-GENERATION COMFORT

MANUFACTURE
DES CEVENNES

THE SEAT THAT BREATHES

THE SEAT THAT BREATHES

With the seat that breathes,
you breathe better. More
freshness, more comfort: air
flows freely, your body relaxes,
and your well-being naturally
increases throughout the day.

MANUFACTURE
DES CEVENNES

ENTER A NEW ERA

BREATHING

We create seats that free the body and mind, helping you regain lightness and energy every day. Our approach: rethinking sitting in a more natural, fluid, and respectful way for everyone. A new era of comfort begins here.

HEALTH

We design seats that support overall health, providing stability, comfort, and energy throughout the day. Our vision: to lighten your daily routine and create a healthier, more balanced work environment. A new standard in workplace health, designed to transform your way of sitting for good.

WELL-BEING

We design seats that bring calm and mental clarity, offering comfort that feels naturally present every day. Our approach: making each seated day simpler, softer, and more balanced. Welcome to a new era — one that is calmer and more natural.

ECO-RESPONSIBILITY

Our choices of local production and short supply chains reduce the carbon footprint while supporting the regional economy. The use of recyclable materials places each seat within a sustainable and responsible approach. Enter a new era: choose comfort that respects both people and the planet.

WELCOME TO THE NEW ERGONOMICS

MICRO-MOVEMENTS

The micromovements of a spring-based seat keep the body active, improve circulation, and reduce tension and stiffness, promoting a more dynamic and comfortable posture.

DECREASE IN SEAT TEMPERATURE

The airflow generated by a spring-based seat reduces heat, providing a cooler, healthier, and more comfortable sitting experience — even over long periods.

STIMULATION OF BLOOD FLOW

The natural movements of a spring-based seat stimulate blood circulation, reducing numbness and fatigue for long-lasting comfort.

REDUCTION OF HUMIDITY

The spring-based seat promotes airflow that reduces humidity and the feeling of dampness, providing a healthier, more pleasant, and longer-lasting sitting experience — even over extended periods.

DEEP MUSCLES ENGAGED

The micro-adjustments of a spring-based seat engage the deep muscles, enhancing stability and reducing posture-related tension.

DURABILITY

The spring-based seat, robust and stable over time, prevents sagging and ensures lasting comfort, making the chair a reliable and long-lasting product.

A TRULY FRENCH KIND OF COMFORT

It is the union of exceptional French craftsmanship, artisanal precision, and elegant comfort. An ergonomic chair, locally manufactured with durable and high-quality materials, offering a work experience that is gentle, refined, and infused with the French art of living.

**MADE IN
FRANCE**

MADE IN
FRANCE

A PRIDE WELL DESERVED

LOCAL MANUFACTURING

Here, everything is made locally. From design to production, each chair comes to life in France, in Anduze, in the heart of the Cévennes. A choice that highlights local craftsmanship, shortens distances, and ensures controlled, consistent quality.

ARTISANAL CRAFTSMANSHIP

Each chair is the result of genuine artisanal know-how. In Anduze, skilled hands shape every detail with care and precision, creating a product that is authentic, durable, and profoundly human.

STITCHING & CRAFTSMANSHIP

Stitching embodies our craftsmanship. In Anduze, every stitch is made with precision, ensuring durable and elegant finishes — the signature of a chair crafted with passion and expertise.

INCLUSION

Our adapted company values the talents of people with diverse backgrounds, most of whom are living with a disability. Each chair reflects this human commitment: a French-made product that is inclusive, fair, and profoundly respectful of everyone.

AN INSPIRED AND INSPIRING COLLECTION

Designed to elevate your everyday life, the seats from the Manufacture des Cévennes combine design, comfort, and character, turning every seated moment into a true source of energy and pleasure.

CLEAR CHOICES, TOTAL COMMITMENT

The FLORAC Compact is a compact ergonomic chair, ideal for workshops, industrial environments, or confined spaces. Its curved wooden backrest and pneumatic lumbar support provide optimal comfort. Sturdy and customizable, it adapts to the needs of each workstation.

Premium comfort with an authentic spirit, FLORAC is an ergonomic and preventive chair that makes high-end quality accessible. Its design, inspired by the Cévennes, reflects unique local craftsmanship. The pocket springs, inspired by bedding technology, provide responsive, durable, and breathable comfort, supporting your posture and reducing fatigue.

The ANDUZE chair with pocket springs provides precise support, excellent ventilation, and enhanced durability, while offering a comfortable suspended feeling. Manufactured in our Adapted Company, it is part of an eco-responsible approach.

The ESPÉROU is an ergonomic chair with a hexagonal design inspired by the Cévennes. It offers superior comfort thanks to its memory-foam upholstery. Modular and adaptable, it adjusts to each user to improve posture. It combines comfort, durability, and eco-responsibility.

The VENTOUX bucket seat offers enveloping support thanks to its inflatable lateral bucket, while ensuring freedom of movement with its shoulder-free backrest design. Its pocket-spring seat provides improved ventilation, delivering lasting comfort and freshness.

The AIGOUAL is a high-end ergonomic chair designed for highly personalized comfort. Its multiple adjustment points and wide range of options allow for a fully tailored fit. Its off-center tilt and ultra-sophisticated mechanism provide exceptional comfort. With its spring-based seat, it improves posture and helps prevent MSDs (musculoskeletal disorders).

MANUFACTURE DES CÉVENNES

RESPONSIBLE AND APPEALING ERGONOMIC SOLUTIONS

The history of the Manufacture des Cévennes has been tied, since its creation in 2013, to the desire to maintain employment for people with disabilities. Initially conceived as a “workplace health pharmacy,” the company gradually evolved toward the manufacturing of ergonomic furniture and physical assistance devices designed to support all employees at work. Naturally, recruitment shifted toward integrating employees with disabilities, creating a virtuous circle: “employees with disabilities serving other employees with disabilities.” Since then, the company has expanded its offering to all workers, including those simply wishing to improve their comfort.

ERGONOMIC

We design and manufacture ergonomic products that are innovative and aesthetically refined, environmentally and socially responsible, and perfectly adapted to users' needs.

SOCIAL

We protect the well-being of people at work, whatever their profession. The company is not an end in itself, but a tool serving a positive impact on society.

INCLUSIVE

In 2025, we employ more than 66% of workers with disabilities in our production workshop, which has been officially recognized as an Adapted Company (EA) by the DREETS since 2019.
