

## PRESENTATION

This sit-stand chair combines the benefits of an ergonomic office chair with the features of a stool. It is the first dynamic-seating work chair designed to help prevent the onset of musculoskeletal disorders (MSDs) by adapting to the user's need to change posture.

It helps avoid excessive pressure on the lower limbs while providing the necessary body support and allowing adequate mobility. It is equipped with an assisted system to support standing up.

Suitable for:

- Operators who remain standing for long periods with very little movement.
- Operators who frequently alternate between sitting and standing positions.
- Users working at elevated workstations between 85 and 100 cm.

User weight capacity: up to 120 kg.
